Redford Union School District Introduces New Security Partnership for Enhanced Safety

Redford Union School District is excited to announce a groundbreaking partnership that marks a significant step in our continuous effort to enhance the safety and well-being of our students, staff, and school community. This school year, we have joined with Safe-Ed, a trusted security and staffing company with over a dozen years of specialized experience in supporting school districts within Southeast Michigan.

At the heart of this partnership is our commitment to ensuring that every person who steps into our schools during the school day is greeted in a manner that is both welcoming and secure. To this end, the experienced security professionals from Safe-Ed will be stationed at the main entrance of our schools and in strategic areas within each building. Their presence is not just a security measure but also a symbol of our unwavering dedication to maintaining a safe and nurturing environment.

Each day, Safe-Ed's security experts will report to our various school locations, bringing with them a focused dedication to the safety of our students. Their presence on campus is a proactive step towards assuring that every day is a safe and productive one for our entire school community.

To make sure these professionals are easily identifiable, they will wear bright yellow shirts, a visual cue of assistance for students, staff, and visitors within our school grounds. This consistent uniform not only makes them easily recognizable, but also serves as a reminder of the security we strive to maintain.

Many of the staff from Safe-Ed are not just trained security experts; they are retired or former law enforcement officers who bring with them rich experiences in dealing with schools and juvenile matters. Their backgrounds provide an added layer of expertise and understanding, particularly in the nuanced environment of an educational setting.

Understanding the dynamic nature of security, Safe-Ed hosts annual training for their employees. These rigorous sessions provide their team with the latest security protocols to respond effectively to any situation. This continuous professional development aligns perfectly with our District's commitment to lifelong learning and improvement.

The launch of this partnership with Safe-Ed is the first of its kind for Redford Union Schools, reflecting our innovative approach to student safety and well-being. By introducing this program, we aim to provide our students with more than just an education. We are offering them a sense of comfort and security, reinforcing the idea that their school is a safe haven. In a world where uncertainties abound, we want our students to be assured that their well-being is our top priority.

As we embark on this journey with Safe-Ed, we are filled with optimism about the positive impact this partnership will have on our school community. We look forward to working with Safe-Ed to provide an even safer, more secure, and welcoming environment for everyone who walks through our doors.
